Objective

MCA student with full-stack development experience using Java, Django, React, and MySQL. Skilled in building user-focused platforms with secure APIs, JWT authentication, and real-time features. Passionate about developing efficient, responsive applications. Strong team player with experience in Agile development and collaborative problem-solving.

Education

APJ Abdul Kalam Technological University , Master of Computer Applications   Sept 2023 – June 2025
- GPA: 7.5/10.0

Experience

Full Stack Developer Intern, Wozti Infotech   Jan 2025 – April 2025
- Developed responsive, user-friendly interfaces with React.js and Bootstrap, implementing interactive UI components based on UX best practices.
- Built and maintained secure backend functionalities using Java, with efficient RESTful API integration.
- Collaborated across teams throughout the development lifecycle to troubleshoot, debug, and optimize application performance.

Projects

Online Market Place For Freelancer
- Developed a full-stack web application using React.js, Bootstrap, and Java with RESTful APIs, enabling project posting, bidding, secure authentication, and task/payment management for freelancers and clients.
- Implemented responsive user dashboards, real-time notifications, and a review/rating system; collaborated in an Agile team using Git and improved usability based on feedback.

Railway Ticket Reservation System
- Developed a scalable railway ticket booking system using Django with real-time train and seat availability, secure payments, and instant booking confirmation.
- Implemented features like ticket cancellation/modification, schedule updates, and a user-friendly UI to improve efficiency and reduce wait times.

Library Management System
- Developed a secure and user-friendly Library Management System that automates the process of recording user entry and exit through card ID swiping .
- The system efficiently tracks user attendance and ensures accurate logging of visit details, enhancing overall library management and security

Technical Skills

Languages: C++, C, Java, SQL, Python, JavaScript

Framework: Django, React , Spring Boot , Bootstrap

Soft Skills : Problem Solving, Communication, Adaptability, Leadership, Analytical thinking, Team Player

Certificates

NPTEL Online Certification in Data Analytics in Python
